

Delayed Hotline^{*}

What is it?

Delayed Hotline allows you to call a particular phone number without dialling. You just pick up the phone, wait four seconds, and the number is dialled automatically.

To connect this service call Telstra on 13 2200.

How do I use it?

To turn Delayed Hotline on

To turn Delayed Hotline off

To check if Delayed Hotline is on or off

Anything else I need to know?

Delayed Hotline overrides Call Control, i.e. Call Control applies when storing the destination, but not when using Delayed Hotline.

000 cannot be stored as a Hotline number.

Hint

Try using Delayed Hotline with your MessageBank service. You will not have to keep dialling your mailbox access number! Or, if you need to contact a particular person in an emergency, program in their number and you can just pick up the phone and Delayed Hotline will call that number for you.
